## Weighing Softwares

- Our software ranges are customer tailored to suit each clients requirement
- They are used in the milk industry, coffee industry ,tea industry among others.

## WEIGHBRIDGE SOFTWARE

The system is window based software known as “Smartweigh” with the following reports:

- Provides the operator with a screen to key in information data such as suppliers name, supplier account number, transporter’s name, vehicle registration etc
- Captures weighed data directly into the PC.
- Automatically prints a ticket with date, time, supplier’s name, account number vehicle registration number, weighing operator’s name.
- Supplier’s, transporter’s vehicle, weighing operators details entered are stored in a file and can be retrieved in future weighing operations.
- Stores all the data in a transaction file and automatically generates reports from the file on request
- Has an editing facility for corrections of erroneous entries during and after entry.
- Has a security feature that prevents unauthorized access to the system.
- Provides an audit trail by maintaining a permanent transaction journal even offers entry of correction

## THE FOLLOWING REPORTS ARE GENERATED

- Transaction journal with all the weighing records for a specific period showing time, date, supplier name e.t.c
- Periodic management reports such as daily, weekly, monthly, periodic management reports such a weekly, monthly, yearly total per supplier/transporter.
- Payment list of supplier and transporter showing the totals of weight and corresponding payment
- Audit trail on periodic basic
- Has a backup facility in-case of accidental deletion of files or files getting corrupted data and program files can be restored from the backup file.
- Network ready

The software to be supplied is our standard weighbridge software any modification and interlink with your ERP will be charged separately.
